Recent Investment Activity

The Investment Committee approved 2 new commitments for CPERS during the Quarter.

Northgate Logistics Partners - \$40.0M, approved October 2025. Not yet funded at Quarter-end.

Northgate Logistics Partners is a value-add industrial fund targeting the acquisition and repositioning of infill logistics and outdoor-storage assets in high-growth Sun Belt and Mountain-West markets, with a strategy focused on lease-up, mark-to-market of below-market rents, and selective development completion.

Ridgeline Value Fund IV - \$25.0M, approved November 2025. Not yet funded at Quarter-end.

Ridgeline Value Fund IV is the fourth vintage in Ridgeline Capital's diversified value-add series, targeting the acquisition and repositioning of multifamily and mixed-use assets in supply-constrained coastal and Mountain-West metros, with a strategy emphasizing operational improvement, unit renovation, and mark-to-market of below-market rents, as well as selective ground-up completion.

The previously approved \$25.0M commitment to **Alder Creek Multifamily Fund III** was withdrawn during the Quarter. The Fund closed at its hard cap without an allocation to the client.

The previously approved \$30.0M commitment to **Sentinel Logistics Income Fund** lapsed during the Quarter. The approval expired unexercised on 30 November 2025 and is not being renewed.

Market Update

The market deck notes that core real-estate values are stabilizing after the 2023–2024 repricing, with U.S. private funds turning positive over the past year and a preference for industrial / logistics and multifamily, while remaining underweight office and selective in retail. Broad private real-estate funds returned **1.0%** net in the latest quarter and **3.3%** over 1-Yr.

At 25Q4, the NPI value-weighted cap rate was **~4.6%**, compared to **~4.2%** for the 10-year Treasury yield. The Portfolio's largest property exposures are Industrial at **36.2%** and Apartment at **23.5%**, with the deck forecasting 2026-27 (p.a.) NOI growth of **~1.3%** for industrial and **~1.4%** for residential.

The office exhibit reports, at 25Q4, appraisal cap rate **~5.6%** versus transaction cap rate **~7.7%**, and the transaction/appraisal gap widened from 0.7 to 2.1 percentage points. A resurgence in rate volatility could re-widen bid-ask spreads and stall the transaction recovery, while refinancing of 2020–2021 vintage debt at higher rates remains a sector-wide overhang, most acute in office, and slower-than-expected supply absorption is noted in select multifamily submarkets. House-view positioning maintains leverage discipline, prefers moderate loan-to-value, tilts toward industrial / logistics and multifamily, underweights office, is selective in retail, and deploys patiently into the recovery as pricing stabilizes.

Values marked ~ are approximate gridline readings at their declared precision, not exact underlying observations.

House-view market indices and the CPERS Custom Benchmark are distinct series; the client benchmark is used for the return-objective test.

Allocation Over Time

The Portfolio's net asset value has moved from **\$372.0M** at 1Q24 to **\$436.1M** at Quarter-end, against a target allocation of **\$495.6M**.

Disclosure Statements

This Performance Measurement Report has been prepared by Vectera Advisors solely for Cascadia Public Employees' Retirement System and is intended for the exclusive and confidential use of CPERS and its authorized representatives. Performance results are presented net of investment management fees, incentive allocations and fund-level expenses unless otherwise indicated, and reflect the reinvestment of income. Returns for periods of one year or less are not annualized. Time-weighted returns (TWR) are calculated using a Modified Dietz methodology; since-inception internal rates of return (IRR) and equity multiples are money-weighted and reflect the timing and magnitude of capital flows. Market values are based on the most recent valuations reported by underlying fund managers and may reflect appraised rather than transaction values. Past performance is not indicative of future results. All figures in this report are synthetic and were created solely for an evaluation exercise.
